

# UPDATED TRAVEL ADVISORY FOR CANTON

---

## Travel Requirement

- All Passengers (including Chinese and foreign citizen) must take a nucleic acid test within 48 hours and within 24 hours before boarding, a total of two time (two nucleic acid test should be separated by more than 24 hours) in designated institutions.
- **Entry is suspended for those with valid visas issued before March 26, 2020.**

## Allowed passengers category to China

### Allowed passenger categories:

- Chinese Nationals
- Hong Kong, Macau, Taiwanese need to hold a Home Return Permit
- Chinese green cards holder or those who have obtained permanent residency
- Foreign nationals with the following types of valid visa's [M/F/Z/S1/S2/Q1/Q2/R/X1/X2/C] issued after Mar 28, 2020
- Valid student residence permit
- APEC Business Travel Card

**Note: other than above passenger categories, please make sure to confirm with CAN station before acceptance**

**All passengers must be in possession of a HS/HDC QR code issued by Chinese Embassy at respective country of departure**

## Health Code Applications

After receiving the negative result of the 2<sup>nd</sup> PCR test the passengers should apply for a health code.

- Please log on to <https://hrhk.cs.mfa.gov.cn/H5/> or scan the QR code below to apply for the greencode from the Chinese embassy.

- Following the steps to register, submit personal information, upload to negative nucleic acid test report (the issuing unit must be the Bangladesh govt health service Bureau (DGHS) and all other required documents (passport data page, proof of vaccination, valid Chinese visa or resident permit etc.) truthfully and accurately answer the questions about personal information and health status, including but not limited to fever symptoms, contact, and travel history.

- The passenger from a third country needs to upload the entry stamp page by the Bangladesh immigration service.
- A screen shot of the email confirming the recovery of the covid 19 confirmed by the embassy (only for those with a history of previous infection)
- Applicants should submit the health code application more than 6 (six) hours before the flight departure time.

## Requirements for Those Infected Before

Persons with a history of previous infection must recover more than 14 days before they can apply for a health code and return to China. The recovery confirmation process is as follows:

The traveler submits two negative nucleic acid test reports issued by the local testing agency to the embassy by email as proof of recovery (sampling time should be at least 24 hours apart and the email address is [hsjc\\_bgd@163.com](mailto:hsjc_bgd@163.com)) and the subject of the email is "Name plus Passport nonplus phone no plus Proof of recovery". After the embassy has passed the review, it will apply to the email to confirm that the patient has recovered.

## Testing Institutions and Procedure

- I. It will check 4-5 hours to get the test result normally. Please be sure to arrange your test timely and upload the health code application materials as soon as possible as required. If the submission is not timely or the submitted materials are incomplete, the health code will not be obtained. Passengers should take the flight within the validity period of the health code and cooperate with the airline for inspection.
- II. Present the green code and two reports with the negative result to the airlines for inspection before boarding the flight.
- III. Testing institutions (Provide all -weather testing service for passengers on flight to China 48 hours and 24 hours before boarding, including at night):
