## Notice on Testing and Health Code application Requirements for Airline Passengers from Bangladesh to China

Embassy of China in Bangladesh

2022-08-08 19:27

### I. Test requirements

All passengers going to China (including Chinese and foreign citizens) must take a nucleic acid test within 48 hours and within 24 hours before boarding, a total of two times (two nucleic acid tests should be separated by more than 24 hours) in designated test institutions.

### II. Health code application

1. After receiving the negative result of the 2st PCR test, the passenger should apply for a health code.
2. Please log on to <https://hrhk.cs.mfa.gov.cn/H5/> or scan the QR code below to apply for the green code from the Chinese Embassy.

3. Following the steps to register, submit personal information, upload two negative nucleic acid test reports (the issuing unit must be the Bangladesh Government Health Service Bureau (DGHS) and all other required documents (passport data page, proof of vaccination, valid Chinese visa or resident permit, etc.) truthfully and accurately answer the questions about your personal information and health status, including but not limited to fever symptoms, contact, and travel history.
4. The passenger from a third country needs to upload the entry stamp page by the Bangladesh Immigration Service.
5. A screenshot of the email confirming the recovery of the COVID-19 confirmed by the embassy (only for those with a history of previous infection)
6. Applicants should submit the health code application more than 6 hours before the flight departure time.

### **III. Requirements for Those Infected Before**

Persons with a history of previous infection must recover for more than 14 days before they can apply for a health code and return to China. The recovery confirmation process is as follows:

The traveler submits two negative nucleic acid test reports issued by the local testing agency to the embassy by email as proof of recovery (sampling time should be at least 24 hours apart, and the email address is [hsjc\\_bgd@163.com](mailto:hsjc_bgd@163.com)), and the subject of the email is "Name +Passport No.+Phone No.+ Proof of recovery". After the embassy has passed the review, it will reply to the email to confirm that the patient has recovered.

### **IV. Requirements for Transiting Passengers**

The embassy in Bangladesh can accept applications for health codes for passengers on flights from third countries to China via Bangladesh and flights departing from Bangladesh via a third country to China.

## V. Important reminders

1. Since Bangladesh International Airport does not have nucleic acid testing conditions, passengers transiting from a third country via Bangladesh must go out of the airport for nucleic acid testing, which will bring inconvenience to the passengers concerned.
2. It will take 4-5 hours to get the test result normally. Please be sure to arrange your test timely and upload the health code application materials as soon as possible as required. If the submission is not timely or the submitted materials are incomplete, the health code will not be obtained. Passengers should take the flight within the validity period of the health code and cooperate with the airline for inspection.
3. Present the green code and two reports with negative results to the airlines for inspection before boarding the flight.
4. Testing institutions (provide all-weather testing services for passengers on flights to China 48 hours and 24 hours before boarding, including at night):

(1) Lab Quest Ltd.

Address: Pearl Trade Center, 3rd Floor, Cha, 90/3, Pragati Sarani Dhaka, 1212
