

LATEST TRAVEL ADVISORY FOR ENTER TO SINGAPORE:

In view of the improving local and global COVID-19 situation, the following changes will be made to the Vaccinated Travel Framework (VTF):

1. All non-fully vaccinated travellers entering Singapore from **28 August 2022, 2359 hours** will no longer be required to undergo a 7-day SHN upon arrival, nor be subject to an exit-SHN Polymerase Chain Reaction (PCR) test. However, they will continue to be required to test negative on a Pre-Departure Test within 2 days before departing for Singapore. Non-fully vaccinated Short-Term Visitors (STVs) will also continue to be required to purchase COVID-19 travel insurance to cover the duration of their stay in Singapore.
2. Currently, non-fully vaccinated Long-Term Pass Holders (LTPHs) and STVs aged 13 and above are required to apply for entry approval to enter Singapore. This requirement will be lifted from **28 August 2022, 2359 hours**. As LTPHs are expected to stay in Singapore for a longer period of time, they will continue to be required to meet all Vaccination-Differentiated Safe Management Measures (VDS)_requirements after their arrival in Singapore.
